

**NOTICE OF INTENT TO ADOPT MITIGATED NEGATIVE DECLARATION ALAMEDA COUNTY
PUBLIC WORKS AGENCY**

Replacement of Drainage Inlet Structures on Foothill Road and Mines Road

The proposed project includes improvements at 26 locations along Foothill Road and 24 locations along Mines Road in unincorporated Alameda County, California. The project involves the removal and reconstruction of concrete splash walls and drainage inlets adjacent to the travel lanes at various locations along Foothill Road (from mile post 5.20 to 8.03) and along Mines Road (from mile post 5.24 to 9.70). The 50 drainage inlet structure locations are identified by mile-post markers along Foothill and Mines Roads. Seven of the sites include work on drainage inlet structures on both sides of the roadway (MP 5.83, MP 6.11, MP 6.17, MP 6.58, MP 6.79, MP 6.87 and MP 7.86). The new structures would not protrude above the earthen or paved surface, thus eliminating the safety hazard caused by the existing structures.

The Mitigated Negative Declaration (MND) and the initial study upon which it is based are available for review at the Alameda County Public Works Agency offices 399 Elmhurst Street Hayward, CA 94544 and at the PWA Website listed below. The document concluded that with proposed mitigation, the project would not result in any significant adverse impacts. If you disagree, please include your reasons with your written comments. The Alameda County Board of Supervisors will consider the MND and all comments received prior to its adoption or approval of the project. Written comments will be accepted during the public review period from July 17, 2013 to August 16, 2013. Comments should be addressed to jimb@acpwa.org or the address below:
